

# **Radiometric Comparison of Ikonos & Landsat 7 ETM+ Observations: Implications for Science Applications**

**Samuel Goward, John Townshend, Paul Davis, David Fleming  
CRESS Project, University of Maryland, Department of Geography**

**High Spatial Resolution Commercial Imagery Workshop  
March 19-21, 2001; Greenbelt, Maryland**

## **Research Goals:**

- **Virtual Ground Truth Capability of Ikonos**
- **Radiometric Comparison with Established Sensors**
- **Value to Scientific Investigations**

Konza Prairie Ikonos 4m (NIR, Red, Green)

# Comparison of Ikonos MTFC On and Off: Planetary Reflectance

## Simple Ratio

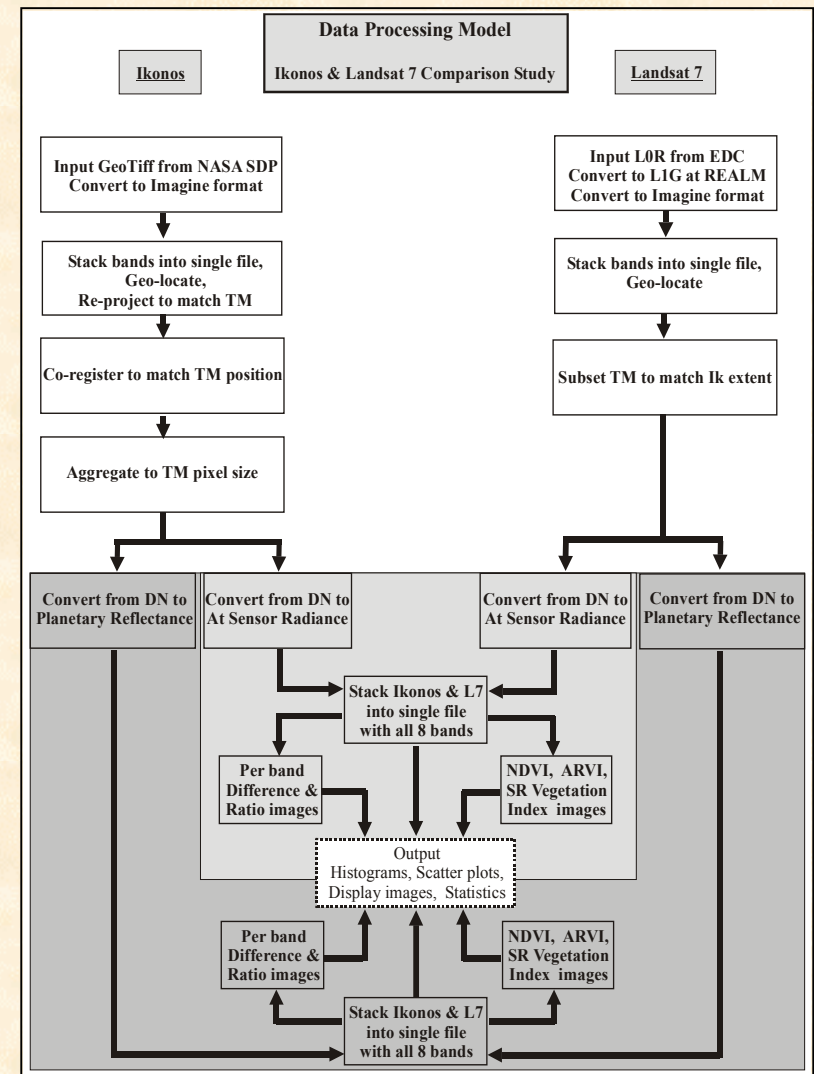

## NDVI

# Methodology for Comparison of Ikonos and Landsat 7:

- **Acquire Ikonos from Science Data Purchase**
- **Acquire coincident ETM+**
- **Match Ikonos to Landsat**
- **Band-to-Band Radiometric Comparison**
- **Vegetation Index Comparison**

# Acquisitions for Comparison of Ikonos and Landsat 7

	<b>Beltsville, MD</b>	<b>Konza, KS</b>	<b>Sevilleta, NM</b>	<b>Tahoe, CA</b>
Land Cover	Humid Forest	Grassland	Semi-Arid	Water, Snow
<b><u>Vegetation</u></b>				
Greening	May 2000	May 2000	May 2000	
Full Leaf	July 2000	July 2000	July 2000	
Senescence	Sept 2000	Sept 2000	Sept 2000	
Snow				March 2000

	<b>Phoenix, AZ</b>	<b>Tahoe, CA</b>	<b>Mongu, Za</b>	<b>Beltsville, MD</b>	<b>Konza, KS</b>	<b>Sevilleta, NM</b>
Land Cover	Urban	Water, Snow	Miombo	Humid Forest	Grassland	Semi-Arid
<b><u>Vegetation</u></b>						
Greening	-	-	-	June 2000	May 2000	May 2000
Full Leaf	-	-	April 2000	-	July 2000	July 2000
Senescence	Oct 1999	-	-	Sept 2000	Sept 2000	Sept 2000
Snow	-	(4/ 2000) 2/2001	-	-	-	-

# Acquisitions for Comparison of Ikonos and Landsat 7

Task	Location	Target date	Acquisition date	Delivery date	Months to Deliver
630	Tahoe City, CA, 1	3/12/00	4/05/00	6/09/00	2

# Comparison of Ikonos and Landsat 7: Evidence of Sensor Limitations

## NDVI image output for Sevilleta, Ikonos & TM

**Certain landscape features are only visible at high resolution.**

**What are the dots/stars in this apparent image from space?**

**Kangaroo Rat holes are visible at 4m, but not at 30m**

**TM**

**Ikonos**

**Sevilleta**

## **Conclusions (to date):**

- **Quality of imaging meets or exceeds expectations.**
- **Supporting technical information (e.g. MTF, radiometric calibration) is not sufficient.**
  - \*\* This demonstrates the value of cal/val activities in the Science Data Buy**
- **Acquisition capacity of single 11km swath limits science applications.**
- **Important contribution to multi-scale assessment of Earth's terrestrial environment.**
